Exporting from EBSCO to RefWorks

This handout explains how to move EBSCO search results into the RefWorks citation tool, after a database search. If there are any problems during this process, turn off your browser’s pop-up blockers.

1. Collect items in a folder:
   - Click for each article record you want to export

2. View folder and export items:
   - Click the Folder on the top of the screen..

3. Check your pop-up blocker and turn it off:
4. Select your articles and export them to RefWorks
   • Click Select / deselect all to select all articles
   • Then click the export icon.

5. Move your article information into RefWorks
   • Click
   • Then click the Export Manager

6 Select the version of RefWorks you have
   • If you don’t have an account – Create one in New RefWorks (the Blue one)
